

Computer Vision and Deep Learning summit

25 June. 2019. Moscow.

Call for posters and demos

Machines Can See is an international summit in Russia bringing together the leading minds of AI to share latest ideas and trends in Computer Vision and Machine Learning.

The summit will include a selected number of poster and demo presentations. To apply, submit a short description of your work e.g., a project webpage, a published paper, an ArXiv report or an online video, at the conference website: machinescansee.com
